REMARKS

Claims 82-86 remain pending in the present application. These claims are copies or are substantially similar to claims in pending Application Serial No. 09/896,821, now US Patent No. 6,976,489. Applicants believe that the newly presented claims are supported by Applicants' specification for the reasons previously presented.

In the Official Action of May 4, 2006, as apparently the only remaining ground of rejection, the Examiner has rejected the pending claims 82-86 on the ground of non-statutory obviousness-type double patenting as being unpatentable over Claims 1-42 of US Patent No. 6,068,609 for the reasons stated in the action. Applicants respectfully disagree that an obviousness-type double patenting rejection is appropriate here. However, in the interest of advancing prosecution, Applicants will agree to the entry of the attached Terminal Disclaimer.

Respectfully submitted,
